Can we measure on U3? 168 value is at 20. Why target 3?

meat 1200 ms
bkgd 531 ms travel
reset 2700 ms

current set U3:
in 1750 ... stop 2650

target scan	803	30K
(U3)	813	22K
	793	6K
	808	34K

why so low a rate? 7×10^{10} intensity

put in U4 current set

808	26K
813	11K
818	4K
823	4K
828	3K but varying

Probably
U4!

back to U3 current set

808	7K
813	22K
813 816	14K
810	28K
807	31K
804	32K
800	22K

so unabet @ 808 + look around

13:25 Run 1867 U3 7×10^{10} target @ 808 30K/s pull
no, I'm not keeping track. Forget 1867

target scan U3

808	0 - 45K	7×10^{10}
813	5 - 150K	
818	20 - 60 - 150K	
823	20 - 110K	
828	70 - 170	
833	150 - 200	
838	170 - 300	
843	150 - 300	
848	40 - 150
