Building 911A
Upton, New York 11973

SUBJECT: Report On An Assessment of Security Risks at the Brookhaven National Laboratory and the STAR Detector upgrade project, Heavy Flavor Tracker (HFT)

Ms. Mirabella,

I am writing this memorandum to confirm that the Brookhaven National Laboratory has an Official Use Only document titled; Report on an Assessment of Security Risks, originally dated, June 8, 2001, with a revision date of September 23, 2008 (currently in revision). All detector equipment has been evaluated for security risks and is included in a threat/risk matrix in the report. The integration of the Heavy Flavor Tracker within the existing Star Detector does not result in any changes to the current document.

The Laboratory Protection Division Physical Security Associate and I met with the HFT Project Manager and discussed the project, providing security recommendations to consider as the project progresses.

If you have any additional questions please contact me at extension 7759 or Leonard Butera at extension 4691.

Sincerely,

A handwritten signature in black ink that reads "John J. Amabile".

John J. Amabile
Manager, Laboratory Protection Division
